Subject: Extension Request: Tutorial 1 – Sarthak Mishra (25BCY10258)

Dear Professor Justin,

I am writing to respectfully request an extension on **Tutorial 1**, which was due this **Wednesday, 24 March**.

Unfortunately, I have been quite unwell recently with a severe flu. My symptoms have made it difficult to focus and complete my academic work to the standard I usually strive for. I am now on the mend and am working hard to catch up, but I would greatly appreciate the opportunity to submit the assignment by **4th April** instead.

I have already completed a significant portion of the initial research and would be happy to share my current progress or provide a medical certificate if required.

Thank you for your time and for considering my request.

Best regards,

Sarthak Mishra

Subject: Summer Internship Inquiry | BTech Computer Science and Engineering | First Year Student

Dear Google University Graduate Recruiter,

I hope this email finds you well.

I am writing to express my strong interest in a summer internship opportunity at Google, specifically

within the software engineering or STEP (Student Training in Engineering Program) teams. As a first-

year Bachelor of Technology (BTech) student majoring in Computer Science and Engineering, I have

been closely following Google's contributions to open-source technology and its commitment to building scalable, global software solutions.

Currently, I am focused on building a rigorous technical foundation in Python and C++ while exploring the fundamentals of data structures and digital literacy. I am an active participant in technical workshops at my university and am eager to apply my problem-solving skills to a collaborative, professional environment. I am particularly interested in how Google utilizes innovative architecture to solve complex real-world challenges.

I have attached my resume and provided links to my GitHub and LinkedIn profiles for your review. I

would welcome the opportunity to discuss how my academic background and passion for technology

align with Google's mission.

Thank you for your time and for considering my application.

Best regards,

Sarthak Mishra
